

DEFENSE INTELLIGENCE AGENCY

WASHINGTON, D.C. 20340-6150

22 February 1991

Mr. Don Mitchell
Staff Member
Senate Select Committee on Intelligence
211 Senate Hart Office Building
Washington, D.C. 20510-6475

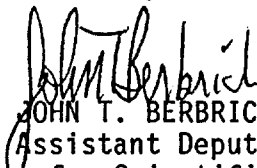

Dear Don:

It was a pleasure meeting you yesterday in conjunction with the update we provided to Senator Glenn and Senator Cohen. You had mentioned that you were not as familiar with the project as perhaps you would like to be. Please accept this as a standing invitation to call upon us to give you any further information you need, to include visiting our facilities and meeting our personnel.

[redacted] and I all commented after the meeting on how comfortable both Senators made us feel during the presentation and discussions. As we were reviewing aspects of the meeting, we focused on the brief discussion we had on space. Our Space Branch has a number of presentations on Soviet and worldwide space developments that may be of interest to Senator Glenn or you because of his background, and we can specifically tailor any of our material to particular areas of interest to the Senator or you. Please accept this also as a standing invitation to request from us any support in this area or other areas dealing with global scientific and technical intelligence developments. Any requests to us should be channeled through DI-3 [redacted] [redacted] who will promptly notify us of the requirement.

Again, it was nice meeting you. If there is anything we can do for you or the Senator, a simple phone call will put everything into motion. When you have a quiet moment with Senator Glenn, please convey our appreciation for the time he gave to hear our presentation and tell him that we all were very honored to meet him.

Sincerely,

JOHN T. BERBRICH
Assistant Deputy Director
for Scientific and
Technical Intelligence
